JOURNAL OF POWER SOURCES VOLUME 43, NUMBERS 1–3, MARCH 15, 1993

Contents

Foreword xi
J. O. Besenhard (Münster, Germany)

Sponsors xii

Scientific Committee xii

Invited Lectures

Lithium/Electrolyte Interface

Behavior of lithium/electrolyte interface in organic solutions. 1
Y. Matsuda (Ube, Japan)

Interfacial phenomena in polymer-electrolyte cells: lithium passivation and cyclability 9
F. Croce and B. Scrosati (Rome, Italy)

Effect of cycling on the lithium/electrolyte interface in organic electrolytes 21
S. Surampudi, D. H. Shen, C.-K. Huang, S. R. Narayanan, A. Attia, G. Halpert (Passadena, CA, USA) and E. Peled (Tel Aviv, Israel)

Lithium electrode cycleability and morphology dependence on current density . . . 27
M. Arakawa, S. Tobishima, Y. Nemoto, M. Ichimura (Ibaraki-ken, Japan) and J. Yamaki (Burnaby, BC, Canada)

Anode Rechargeability, Insertion Anodes

Some aspects on the preparation, structure and physical and electrochemical properties of Li_xC_6 39
R. Yazami (St-Martin-d'Hères, France) and D. Guérard (Vandœuvre-lès-Nancy, France)

Electrochemical and spectroscopic studies of carbon electrodes in lithium battery electrolyte systems 47
O. (Youngman) Chusid, Y. Ein Ely and D. Aurbach (Ramat Gan, Israel), M. Babai and Y. Carmeli (Rehovot, Israel)

Electrochemical study of the passivating layer on lithium intercalated carbon electrodes in nonaqueous solvents. 65
B. Simon and J. P. Boeuve (Marcoussis, France), M. Broussely (Poitiers, France)

A new negative electrode matrix, BC_2N, for rechargeable lithium batteries. 75
Y. Matsuda, M. Morita, T. Hanada and M. Kawaguchi (Ube, Japan)

Polymer Electrolytes

Impedance study of the interfaces between lithium, polyaniline, lithium-doped MnO_2 and modified poly(ethylene oxide) electrolyte. 83
W. Baochen, F. Li and X. Yongyao (Changchun, China)

Application of solid-polymer electrolyte in lithium batteries: ultra-thin film battery 89
T. Noda, S. Kato, Y. Yoshihisa, K. Takeuchi and K. Murata (Osaka, Japan)

Elsevier Sequoia

Thin-film Technology, Solid Electrolytes

Fabrication and characterization of amorphous lithium electrolyte thin films and rechargeable thin-film batteries 103
J. B. Bates, N. J. Dudney, G. R. Gruzalski, R. A. Zuhr, A. Choudhury, C. F. Luck (Oak Ridge, TN, USA) and J. D. Robertson (Lexington, KY, USA)

Modeling the discharge behaviour of the lithium/iodine battery 111
P. M. Skarstad and C. L. Schmidt (Minneapolis, MN, USA)

Parasitic reactions and the balance of materials in lithium batteries for implantable medical devices 119
A. M. Crespi and P. M. Skarstad (Minneapolis, MN, USA)

Thin-film vanadium oxide electrodes for lithium batteries 127
K. West, B. Zachau-Christiansen, T. Jacobsen and S. Skaarup (Lyngby, Denmark)

Electrochemical behaviors of Li^+ ion conductor, Li_3PO_4–Li_2S–SiS_2 135
K. Takada, N. Aotani and S. Kondo (Osaka, Japan)

New Investigation Techniques and Cell Modelling

Recent advances in experimental methods applied to lithium battery researches 145
C. S. Cha and H. X. Yang (Wuhan, China)

Photoelectrochemistry of lithium 157
E. S. Nimon, A. V. Churikov, I. M. Gamayunova and A. L. Lvov (Saratov, Russian Federation)

Metal deposition and dissolution monitored by *in situ* scanning tunneling microscopy 169
U. Stimming, R. Vogel (Jülich, Germany), D. M. Kolb and T. Will (Ulm, Germany)

A model for the deliverable capacity of the TiS_2 electrode in a Li/TiS_2 cell 181
Z. Mao and R. E. White (College Station, TX, USA)

Rechargeable Systems

Ambient temperature rechargeable polymer electrolyte batteries 195
K. M. Abraham and M. Alamgir (Norwood, MA, USA)

Li/Li_xNiO_2 and Li/Li_xCoO_2 rechargeable systems: comparative study and performance of practical cells 209
M. Broussely, F. Perton, J. Labat (Poitiers, France), R. J. Staniewicz and A. Romero (Cokeysville, MD, USA)

Investigation of an electrolyte for lithium secondary batteries with lithium-containing manganese dioxide as the positive material 217
H. Watanabe, T. Nohma, I. Nakane, S. Yoshimura, K. Nishio and T. Saito (Osaka, Japan)

The SWING system, a nonaqueous rechargeable carbon/metal oxide cell 223
R. Bittihn, R. Herr and D. Hoge (Kelkheim/Taunus, Germany)

High voltage, rechargeable lithium batteries using newly-developed carbon for negative electrode material 233
J. Yamaura, Y. Ozaki, A. Morita and A. Ohta (Osaka, Japan)

Lithium-ion rechargeable cells with $LiCoO_2$ and carbon electrodes 241
K. Sekai, H. Azuma, A. Omaru, S. Fujita, H. Imoto, T. Endo, K. Yamaura, Y. Nishi, S. Mashiko and M. Yokogawa (Tokyo, Japan)

Safety and Reliability of Lithium Batteries

Safety and reliability studies of primary lithium batteries 247
S. C. Levy (Albuquerque, NM, USA)

A study on electrolytes for manganese dioxide–lithium cells 253
M. Takahashi, S. Yoshimura, I. Nakane, T. Nohma, K. Nishio and T. Saito (Osaka, Japan), M. Fujimoto, S. Narukawa, M. Hara and N. Furukawa (Hyogo, Japan)

Safety aspects in primary high-rate lithium cells 259
G. Eichinger (Buedingen, Germany)

Cathode Materials

Electrodes for lithium batteries 269
J. B. Goodenough, A. Manthiram and B. Wnetrzewski (Austin, TX, USA)

Transition metal displacement in cathodic host structures upon lithium intercalation 277
R. Brec, E. Prouzet and G. Ouvrard (Nantes, France)

The versatility of MnO_2 for lithium battery applications 289
M. M. Thackeray, M. H. Rossouw, A. De Kock, A. P. De la Harpe, R. J. Gummow, K. Pearce and D. C. Liles (Pretoria, South Africa)

Lithium insertion into TiS_2 from various electrolytes 301
A. M. Skundin, E. E. Stefanovskaya and O. Yu. Egorkina (Moscow, Russia Federation)

High Power Lithium Batteries

Thermal modelling of a high power $Li/SOCl_2$ cell with parallel plates 309
Q. Lin, T. Yixiong, M. Xuezhang, Q. Ruizhen, W. Jiqiang (Tianjin, China), C. Yuegeng and Z. Heng (Beijing, China)

A high power lithium thionyl chloride battery for space applications 317
P. M. Shah (Horsham, PA, USA)

Design concepts of high power bipolar rechargeable lithium battery 327
D. H. Shen and G. Halpert (Pasadena, CA, USA)

Please note that the page numbering for these Proceedings is continuous throughout Volumes 43 and 44, and Author and Subject Indexes will be published at the end of Volume 44.
